

Simplified Dental Anatomy Notes

Sample study notes for junior students - 32-page summary (excerpt)

1. Permanent incisors: single root, incisal edge, lingual fossa.
2. Canines: longest root in the arch, single cusp.
3. Premolars: buccal and lingual cusps, occlusal grooves.
4. Molars: 4-5 cusps, multi-rooted, maximal occlusal surface.
5. Primary vs permanent: smaller crowns, whiter enamel, thinner enamel/dentin, larger pulp chambers.

...
